

The most highly recommended bed in America.™

# Congratulations

...on choosing your Tempur-Pedic® bed!

The following tips will help ensure you get the best sleep of your life on your new Tempur-Pedic mattress...

- Your mattress may feel slightly firmer than the one on the showroom floor. It can take a few weeks to break-in your new bed and for you to become accustomed to the unique feeling of a Tempur-Pedic mattress. You can speed up the break-in period by simply spending a little extra time in bed reading, watching TV, etc.
- Your new mattress may have a slight odor remaining from our manufacturing process. This is normal. It's completely harmless and will dissipate in a few days. All polyurethane-based materials have this characteristic.
- Your Tempur-Pedic mattress requires a firm, solid-surface foundation or adjustable base that is structurally capable of supporting it (no box spring). Your warranty is based on a "set" that consists of a Tempur-Pedic mattress with a Tempur-Pedic foundation and/or a TEMPUR-Ergo™ Collection adjustable base. See warranty for additional details.
- Tempur-Pedic mattresses are sensitive to temperature—cooler temperatures will make the mattress feel firmer while warmer temperatures will give your mattress a softer feel. It may take a few hours for your new bed to acclimate to your bedroom. We do not recommend using an electric blanket or heating pad with your mattress. These items may impair the ability of the TEMPUR® material in your mattress to react to your body temperature and conform exactly to your body shape.
- Conventional, poly-filled or quilted mattress pads will act as a barrier and affect your experience and enjoyment of the full pressure-relieving qualities of our proprietary TEMPUR material. We offer mattress protectors designed to optimize the performance of our products.
- Your Tempur-Pedic mattress features a one-sided design and should never be flipped.
- When moving or storing your mattress, lay the mattress flat, not on its side or folded.  
NOTE: Your mattress may be delivered folded to make it easier for the delivery team to handle. If so — particularly in weather below 50°F, do not force it to lay flat. It may take a few hours, but your mattress will naturally flatten as it warms up. The handles included on some mattress models are for positioning purposes only, not for carrying.
- The covers on some Tempur-Pedic mattress models are removable for laundering. Please check the tags sewn into your mattress cover for details or contact our Customer Service Department if you are unsure. Never wash TEMPUR material.
